```
Tekct Dockerfile - backend:

FROM python:3.6-alpine

ENV PYTHONUNBUFFERED 1

RUN mkdir /back

WORKDIR /back
```

```
RUN mkdir /back

WORKDIR /back

COPY req.txt /back/

RUN pip install -r req.txt

COPY manage.py /back/

COPY perfume /back/perfume

COPY db.sqlite3 /back/

COPY perfume app /back/perfume app
```

CMD ["python3", "manage.py", "runserver", "0.0.0.0:8000"]

## Текст Dockerfile – frontend (perfume-vue):

```
FROM node:10-alpine

RUN mkdir /front

WORKDIR /front

COPY ./package*.json ./

RUN npm install

RUN npm install -g http-server

COPY . ./

EXPOSE 8080

CMD ["npm","run","dev"]
```

## Текст Docker Compose:

```
version: "3"
services:
  backend:
  build: .
  ports:
    - "8000:8000"
  frontend:
  build: perfume-vue/
  network_mode: host
  ports:
```

- "8080:8080"

depends on:

- backend

## Запуск контейнеров:

Скриншот результата команды docker ps, выполненной после запуска контейнеров:
